

Water Tech Company

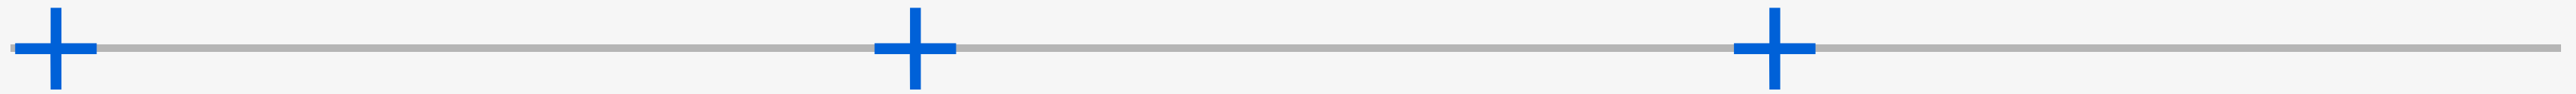

CASE STUDY

Challenges

They need someone who can

Help get the baseline water usage cost per year for clients and subagents.

Create a spreadsheet and analyse the data gathered.

Collate all necessary information about water consumption and plumbing sizes.

Solution

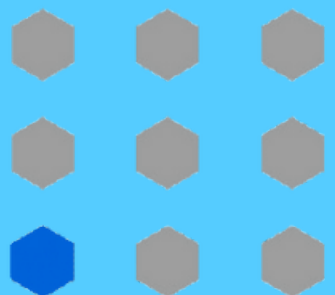

What we did

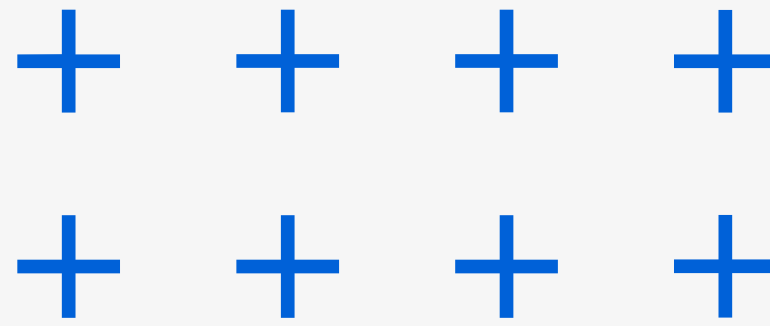

VA created a spreadsheet with a table and formula for analysis

Proposed new water and sewer rate based from the analysis

Provided detailed information about water consumption and plumbing sizes.

Results

- Detailed data is always ready to be presented.
- Since detailed information is readily available, the company's agents are able to make immediate decisions.
- The company representatives are able to present quotation accurately and efficiently.
- The client was retained for a longer period because of the quality work provided by the VA.
